

1. **Xerox G4 Pro 30kW (Three Phase Inverter 30kW –G4 Pro 30K/45kV)**

The Xerox G4 Pro 30 kW is a next-generation three-phase inverter designed for commercial and utility-scale solar systems. Engineered for larger installations, it combines exceptional conversion efficiency, wide input compatibility, and scalable design. With a power class of 30 kW, it is the perfect choice for projects that demand uninterrupted performance, robust safety, and advanced grid compliance.

Wide Compatibility

The inverter ensures stable energy flow and real-time monitoring across commercial setups. It features multiple MPPT trackers for optimized power harvest, supports seamless connectivity (WiFi, Ethernet, optional 4G), and allows export limitation and diagnostics for full control of system performance

Superb Safety & Reliability

The Xerox G4 Pro 30 kW offers full DC/AC surge and fault protection, reverse polarity safeguards, and anti-islanding for uninterrupted operation. With advanced thermal management, it delivers consistent performance up to 60 °C and complies with global safety and grid standards; ensuring secure, reliable use in commercial and utility-scale solar systems.
